SKILLS

Frontend: HTML, CSS, Javascript, React, Redux, CSS-in-JS

Backend: NodeJS, Express, Firebase

Version Control: GIT

Databases: MongoDB, MySQL

Tools and Infrastructure: Netlify, AWS, Periscope, Jenkins

EDUCATION

University of California, Merced - B.S Computer Science and Engineering

August 2013 - July 2019

EXPERIENCE

Battlefy | Vancouver, British Columbia - Software Engineer

January 2019 - PRESENT

- Collaborated with a team of designers, engineers, and PMs to ideate, design, implement, and iterate on various features for the Battlefy platform.
- Contributed to re-designing the user event-tracking framework, providing a streamlined flow for tracking user events on the platform.
- Worked on a variety of B2B deal projects providing a unique esports experience for players and organizers.
- Built in-house tools and several features on the platform to eliminate tedious tasks originally done by our admins and/or devs, which led to an increase in saved time for multiple teams.

Zedge | San Francisco, California - Software Engineer

April 2018 - January 2019

- Utilized React and Redux to build a content management platform for a company in Norway with a small team of 3 Senior Engineers.
- Architected solutions towards building new functionality, implementing new UI, and fixing current issues in the application.
- Cooperated in weekly dev meetings to discuss a variety of topics regarding development and overview new wireframes.

SAP | Palo Alto, California - Software Engineer, Intern

May 2017 - November 2017

- Created new RESTful APIs with javascript to replace hard coded data with a dynamic service for their search module.
- Refactored the search module to allow different applications to utilize a centralized search service.
- Improved data indexing time from 3 minutes to nearly a second by replacing their messaging protocol from HTTP to AMQP.

LEADERSHIP

XD Hacks 2019 | Vancouver, British Columbia - Mentor

HackMerced 2018 | Merced, California - Mentor

HackMerced 2017 | Merced, California - Director of Engineering
